

The DX Bulletin

ISSUE 133 MARCH 15, 1982

Propagation: Mar 15, High/Low Normal; Mar 16, Below Normal; Mar 17, Low Normal; Mar 18, Low/Below Normal; Mar 19, High/Low Normal; Mar 20-23, Low Normal; Mar 24, Below Normal; Mar 25, Low/Below Normal; Mar 26, High Normal; Mar 27, Above Normal, going to Disturbed; Mar 28, 29, Disturbed. TNX N4XX.

We are going to be disturbed if these forecasts don't get better!

VK9XT and VK9XM came on from Christmas Island exactly on schedule Mar 10. From Cocos they reportedly made it to the East Coast on 3.5 MHz only to the Southeastern states, Florida and Alabama and Georgia. Christmas is the last of this two-stop operation by VK3OT and K1MM.

KP2A/KP1 Navassa should be on now through Mar 22, an all band operation by up to ten hams. Demand for Navassa (at least among TDXB's elite readership) will not be great...less than five percent of you surveyed last year needed it. Should be no sweat for newcomers seeking KP1. QSL manager is WB2MSH.

5R8AL's weekly showing is on 21337 around 1800-1900Z on Fridays. He sometimes operates 2-way CW on this spot.

BV2A/B's main day of operating is Wednesdays, where he can sometimes be found around 14210 1200-1500Z, and less often on 14025 CW. He also appears Saturdays on 10 Meters phone and CW around 2300Z.

DL1VU now on from the Tokelaus signing ZM7VU until about April 17; CW only, likes the low bands.

XZ9A worked a number of stations in the ARRL DX Competition Phone Mar 6/7; there is talk that the ARRL Board of Directors will ask the DX Advisory Committee to make a recommendation on acceptance or not for DXCC of XZ5A and XZ9A. Headquarters sources assert no chance of this happening exists, be-

cause the operations there in the Golden Triangle are "unauthorized," and such acceptance would set a bad precedent. Other current unauthorized operations which do not meet DXCC criteria include those by several A6 U.A.E. stations.

FB8WG Crozet has almost disappeared from the bands...we have one Bandpass report on him this week. Rumor has him leaving the island in the near future, perhaps within a month. Seeing how much (if any) Crozet drops on our Survey Needed List next month is going to be our inspiration to do that job! Recommendations for finding him? Try the 14225 slot at 1400-1600, the low end of 20 CW 1300-1400, and the French Net on 14110 afternoons and evenings.

As reported last issue, ZD9BV Tristan da Cunha continues his entry to amateur radio almost daily; lists are taken somewhat haphazardly starting around 1700Z on 21337 and Andy shows around 1800Z. Unfortunately, he leaves just as the band is opening to the West Coast, around 2000Z. Occasionally the operation is moved to 28621 if it is felt propagation would be better there.

Several thoughts come to mind as one listens to this (and other) list operations, especially since Andy is "learning the ropes" and setting a good example is so important. The first suggestion we could make relates to the use of phonetics on voice...although Andy speaks English it might help greatly if all would stick to the standard, accepted ICAO list (used internationally for air traffic control), etc. These are the familiar (over)

The DX Bulletin (ISSN 0279-8077) is published weekly fifty times per year for \$26 per year in the U.S., Canada and Mexico; all others \$35 per year. The DX Bulletin is published at 306 Vernon Ave., Vernon, CT 06066 Second-class postage paid at Vernon, CT. POSTMASTER: Send address changes to The DX Bulletin, 306 Vernon Ave., Vernon, Connecticut 06066

ZD9BV (cont'd) Alpha, Bravo, Charlie, Delta, etc. Andy is already acquainted with these phonetics. The times we have listened he was getting about half the callsigns wrong.

On a related note, the bulk of the M/C chores have been taken over by ZD8TC, who is doing entirely too much relaying of calls and signal reports. In fact, he is keeping the log for ZD9BV and was heard to say "I am doing the logging and I am getting the calls right" (so don't worry if Andy doesn't). This is NOT 2-way communication.

Finally, if list operations are to be required in cases like this, we need good, experienced operators with effective stations to run the operations. One day last week, N4PN came on and saved the day for the lists using well-established contest procedures to make the lists. He did 21 stations in about one minute.

Meant as constructive suggestions.

KF10/CE0X QSLs now being mailed by WA2IZN, who has all requests no matter where they were originally sent. Newington says DO NOT send for DXCC credit; the matter is still under advisement and no decision has been made.

VK9NM/Lord Howe (DJ5CQ) should continue until Mar 18, followed by a month of operating from Norfolk.

ZK1CG/N. Cooks slated to leave for home on the S. Cooks Mar 16.

5W1DV and 5W1DW seem to have shown from this, their first stop, a fews later than originally scheduled; first reports on 5W1DW were Mar 7. Next stop Niue (see Calendar) then Tonga, depending on cyclone damage there. Gary Huff, K9AUB, says A35JL's home was badly damaged, and he lost his radio gear as well as all QSLs and records. If you've worked A35JL you may send a duplicate QSL via K9AUB.

Poland's PZK QSL bureau is now operating, but DO NOT send cards dated after Dec 31, 1981 (the day martial law began). Many are listening but no transmitting.

Mario Gallavotti, I0MGM, reports that during previously announced 1A0KM operations on Feb 13 and 14, 3500 SSB contacts were made. This was the first operation from SMOM in 1982, and future operations will be announced. In other words, if you don't see advance publicity, any 1A0KM you work will be a pirate.

In Issue 131, the listing for Memphis's VHF spot should have read 145.785. Also, add 146.46 for San Antonio.

If you worked V2AMK on all six bands during the ARRL CW DX Competition, you are eligible for a special certificate, and you'll get a special QSL if you worked 'em on 160 or 80 Meters. Several amateurs participated in this operation, and QSL as follows:

<u>K9LA/V2A</u> to <u>N0DH</u>	<u>K9MK/V2A</u> to <u>K9MK</u>
<u>K9DX/V2A</u> to <u>N0DH</u>	<u>N9PI/V2A</u> to <u>N0DH</u>
<u>V2AMK</u> to <u>N0DH</u>	<u>VP2MMP</u> to <u>N0DH</u>
<u>VP2MMP</u> to <u>N0DH</u>	

K9MK: Mike Krzystyniak, 6061 Dunson Ct, Watauga TX 76148.

N0DH: Dave Henderson, 2031 E. Gary, Mesa AZ 85203.

TDXB's toll-free telephone is not getting the workout we had hoped for. Please call anytime you have information you think belongs in the Bull. TNX.

Dayton Hamvention preliminary guest list includes Vince Thompson, K5VT, Jacques Bernier, W4LZZ (lately of 3X1Z), Dr. Fernando Martin, EA8AK, and the usual ARRL and CQ dignitaries (W3AZD, N4MM, W0SR).

Recent 160 Meter action from Italy was by special authorization for Contests only. The band is not slated to be opened up for full-time operation there. I0ONU was by I0JX and IR8ONU was by I8ULL (QSLs to I8UDB). A few lucky U.S. East Coast 160 Meter operators made it through to them.

Look for Bermuda during the CQ WPX SSB test later this month in the form of K0CS/VP9 and W8TN/VP9 (nice call!). QSL to respective c/b addresses.

3V8DX: Op Fred to G3SVK, Op Harvey G4JDT.

BANDPASS: Call/Frequency/UTC (plus West, Central, East Coast report)/Date

LETTERS

Gary Grant: Cancel my subscription! "I
 K6VOQ am sick of reading your

opinions! The guy who called you a hypocrite sure had you pegged on the issue of list operations! Issue 131, in which you found it necessary to publish Bob Read's problems with the law, an issue which is private and has no bearing on amateur radio or DXing, convinced me that you have no integrity. In conclusion, I'd like to add that you are no gentleman."

The editor replies: Gosh! I published the arrest information because rumors had blown it out of proportion! I withheld the information one week until the rumors got out of hand! In the last two weeks I

have counted four other publications which have picked up the story! Maybe they have no integrity either! Should we cancel the First Amendment?! Gosh! !! !!

As you know, April is the time for the Annual TDXB Countries-Needed Survey of subscribers...this involves tabulating the need lists of about a thousand DXers. Anyone out there with a computer want to tackle the job? We can even pay you to do it. Please contact TDXB immediately if you are interested. TNX.
